

# SIX REASONS TO PRESSURE WASH WOOD SIDING

## Quick and Efficient Cleaning

Washing wood siding with a pressure washer is the fastest way to restore its appearance. What might take days by hand can be completed in just a few hours.

## Stops Mold in Its Tracks

Mold and mildew can harm both your home and your health. Power washing removes these contaminants completely, helping prevent respiratory issues and further growth.

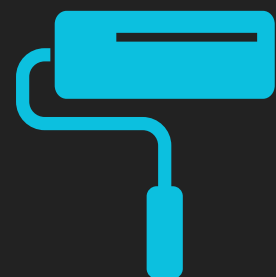

## Boosts Curb Appeal Instantly

A freshly cleaned exterior makes a strong first impression. Power washing your siding can increase market value and make your home stand out in the neighborhood.

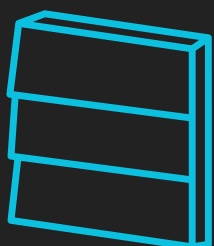

## Discourages Pest Infestations

Grimy wood siding attracts termites and other wood-loving pests. A power wash clears away debris and bugs that might otherwise settle in and cause damage.

## Ideal Prep for Painting

Paint and stain won't adhere properly to dirty surfaces. Power washing creates a clean foundation, ensuring your finish lasts longer and looks better.

## Extends Siding Lifespan

Built-up dirt and grime degrade wood over time. Keeping siding clean through routine power washing helps prevent premature wear and extends its life.
